ALTERLIFE
FITNESS EXCELLENCE

MISSION

Our mission is to help our fellow citizens incorporate physical exercise and its valuable benefits in their lifestyle, thus maximizing the percentage of those who intentionally and consciously deal with any kind of physical activity.

ALTERLIFE

ALTERLIFE means alternative - new life, it originates the transition to a new status where physical pain, low esteem, lack of confidence and all those limitations that prevent you from fulfilling your dreams, no longer exist. In ALTERLIFE you change your philosophy, your priorities, your attitude towards your body, yourself, towards life!

VISION

Our vision is to set these high standards - quality of services and marketing practices - in order for ALTERLIFE to be considered a benchmark for everyone (trainees, professionals and businessmen) in the fitness industry in Greece and Cyprus!

CORPORATE SOCIAL RESPONSIBILITY

When you have the ambition to become the reference point and set the standards in a whole industry, when you wish to leave your legacy, the challenge is enormous. It is imperative that your values be based on those principles that help modern societies evolve, prosper and thrive. Being confident in our values we strategically undertake social responsibility actions thus introducing a new company-business culture that will help us implement our vision. We count and look forward on your valuable support in our endeavor, which seems to be the most challenging and demanding.

RELEASE YOUR ENERGY

UNBLOCK YOUR BODY
AND RELEASE YOUR TRAPPED ENERGY!

WHAT IS RELEASE YOUR ENERGY ALL ABOUT?

MYO-PERITONIAL PAIN RELEASE AND TRIGGER POINTS !

The fascia is a hard membrane of different thickness that encloses and separates all body structures, from entire muscle groups and bones to each individual cell, providing protection and communication of tissues. It is like a three-dimensional net that surrounds muscle fibers, tendons, ligaments, nerves, organs and vessels. The fascia consists of collagen fibers (40%) and lubricants.

Myo-peritoneal release is a soft tissue therapy technique that involves the application of specific pressures and stretching to myo-peritoneal constraints in order to reduce pain and restore elasticity and movement. Myo-peritoneal trigger points are small, entangled, hypersensitive foci in the muscles and the fascia and give the feeling of a tough "knot" between the muscle fibers.

RELEASE YOUR ENERGY WILL

- _ Hydrate the lubricant of collagen fibers and the entire fascia system
- _ Increase the distance between the collagen fibers and restore the elasticity of the area
- _ Reduce the pressure exerted on adjacent structures
- _ Relax the active trigger points as well as the myopathoric constraints that contribute to the pain, inelasticity and dysfunction of the area

LIVE A VIVID EXTROVERT LIFE WITHOUT LIMITATIONS!
ENJOY EVERY SINGLE ASPECT OF YOUR LIFE!
